Ux Ui | Web Designer

User Experience (UX) Design | User Interface (UI) Design | User Research & Usability Testing |
Sketch, Figma, Adobe XD | Wireframing & Prototyping

Senior UX/UI Designer with 4+ years of experience delivering intuitive, high-impact digital products across SaaS platforms, dashboards, and mobile applications. Skilled in design systems, user research, and translating business needs into user-friendly interfaces.

WORK EXPERIENCE

Technet World – Ben Arous, Tunis, Tunisia

05/2025 – Present

Senior Ux Designer

- Lead UX design for an employee tracking system platform, creating wireframes, interactive prototypes, and conducting usability testing to ensure intuitive navigation and accurate data visualization.
- Develop and maintain scalable design systems, ensuring consistency, accessibility, and efficiency across multiple digital products.
- Design and implement responsive dashboards with clear data hierarchy and interactive elements, improving user decision-making speed.
- Collaborate with product managers and developers to translate business requirements into user-focused digital solutions.
- Conduct user research and feedback sessions to refine product usability, resulting in continuous user experience improvements.
- Optimize workflows and interaction patterns to reduce cognitive load and enhance productivity for end-users.

Concentrix – Kram, Tunis, Tunisia

01/2025 – 05/2025

IT Consultant and advisor (Uber Merchant Platform)

- Provided technical support and troubleshooting for Uber's restaurant-side merchant platform, ensuring minimal disruption to merchant operations.
- Resolved complex technical issues by diagnosing problems, escalating when needed, and collaborating with cross-functional teams.

- Collected and analyzed merchant feedback on app and dashboard usability, providing insights that informed UX improvements.
- Guided merchants in efficiently navigating and utilizing platform features, improving their operational workflows.

Hello Dati – Tunis, Tunisia

03/2023 – 01/2025

Ux Ui Designer

- Designed automated data flows, dashboards, and visualizations, reducing manual processing time by 40%.
- Organized UX/UI workshops and research sessions with stakeholders, increasing user satisfaction by 30%.
- Managed design systems to enhance cross-project consistency, boosting team productivity by 25%.

Xelero – Tunis, Tunisia

06/2022 – 02/2023

Ux Ui Designer

- Researched client needs, developed personas, and mapped user journeys, increasing user engagement by 50%.
- Designed wireframes and prototypes that cut development time by 20%.
- Delivered UI mockups, MVPs, and final products, improving user retention by 35%.
- Built reusable UI components, reducing project costs by 15%.

Naza Dev Solutions (Startup) / Fidness – Tunis, Tunisia

06/2021 – 06/2022

Ux Ui Designer | Graphic Designer

Naza Dev Solution served as the technical supervisor and strategic advisor for Fidness, a startup focused on creating a fidelity wallet for users seeking to centralize and manage their various loyalty cards within a single application.

- Developed wireframes and prototypes based on client needs, ensuring a 30% faster approval rate from clients. Monitored design integration and collaboration with the development team, achieving seamless user experience and reducing redesign efforts by 20%.
- I crafted social media posts for “BBA Call Center” and “Frank Provost Paris” that improved their competitive positioning by a significant percentage.
